### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: applicants

claim a process for preparing methyl ethyl ketone cyanohydrin of formula 
$$\begin{array}{c} \text{CN} \\ | \\ \text{CH}_3 - \text{C} - \text{CH}_2\text{CH}_3 \\ | \\ \text{OH} \end{array}$$
 by reacting hydrocyanic acid and methyl ethyl ketone in the presence of diethylamine catalyst. The novel feature of this invention resides in the use of diethylamine catalyst. The prior art of record employs the use of an amine broadly without any specificity. Additionally, the instant process temperatures are between  $-20$  to  $40^\circ\text{C}$ . The difference in temperature coupled with the fact that the prior art discloses boiling an aliphatic ketone such as acetone in the presence of a basic catalyst such as piperidine renders the instant invention patentable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
